

Occupied Bandwidth Results

Similar to conducted emissions, occupied bandwidth measurements are only provided for selected frequencies in order to reduce the amount of submitted data. Data were taken at the extreme and mid frequencies of the USPCS frequency band. Table 8.2 below lists the measured 99% power and -26dBC occupied bandwidths. Spectrum analyzer plots are included on the following pages.

Frequency	99% Occupied BW	-26dBC Bandwidth
1850.2 MHz	248.3 kHz	315 kHz
1880.0 MHz	250.0 kHz	325 kHz
1909.8 MHz	248.3 kHz	313 kHz
