

The image shows a Samsung smartphone disassembled into two main parts. On the left is the back cover, which is black and contains the camera lens, a QR code, and some internal wiring. On the right is the main body of the phone, which is also black and shows the internal battery compartment. The battery is a Samsung model ME6NH, with a capacity of 0824.0 and a date code of 0040-4. An orange FPC (Flexible Printed Circuit) connector is visible, labeled 'FPC-H11057H220-A1' and 'JBE 1934'. A ruler is placed vertically on the left side of the phone for scale, showing measurements from 1 cm to 25 cm.
