Use the equipped Type-C cable to connect power adapter and the charging port in gimbal's handle. The gimbal is in charging state when indicator is on; When [••••] full bars show, the gimbal battery is fully charged.

The battery of SMART XE was already mounted in battery tank ahead of shipment. Before first use, please fully charge SMART XE to activate it for normal use.

Product Parameters

Product size	273*125*65mm (Unfolded size)
	163*108*55mm (Folded size)
Product weight	350g±5g
Payload	≤250g
Battery life	About 10 hours
Charging time	About 3.5 hours
Working voltage	3.6V
Power Input	5V/1A
Working temperature	0°C-55°C
Li-ion battery	3.6V/2550mAh
Fit for cellphone width	55-90mm
Angle accuracy	0.01°
Mechanical pan angles	310°
Mechanical roll angles	337°
Mechanical tilt angles	345°
Controllable pan angles	275°
Controllable roll angles	318°
Controllable tilt angles	83°

Above data stems from the testing data in the laboratory. The actual data is subject to vary to some extent under different testing conditions. Please refer to the real using experience.

Warranty Terms

1. Within 15 days from the date of purchase, the product with any functional malfunction or quality problems will be replaced for free, under the premise that the product and packaging are not damaged. We will offer a brand new one after confirming the product problem.
2. The product will enjoy 1-year free warranty for use under normal conditions (all accidental or artificial damages, and damages caused by improper disassembly or misuse are NOT covered by the warranty).
3. Please keep and offer the warranty card for claiming the warranty service.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluatec to meel general RF exposure requirement. The device can be used in portable exposure condition without restriction.
