

SETTING UP YOUR BLUETOOTH® SMART SCALE USING BLUETOOTH® 4.0 TECHNOLOGY

The BLUETOOTH® SMART SCALE can estimate daily calorie estimates, BMI and weight difference compared to goal weight and real weight, and then it transmits your results to an app on a mobile device using Bluetooth® 4.0 technology. You can use your BLUETOOTH® SMART SCALE with or without Bluetooth® 4.0 transmitting data. Below are the directions for setting up the scale using Bluetooth® 4.0.

BLUETOOTH® SMART SCALE REQUIREMENTS

The Bluetooth® Smart Scale is designed to be used with the following mobile devices:

- **iOS**
iPhone, iPad and iPod Touch, iPod mini
– using IOS 12.0 and newer
- **Android**
5.0 (API 21) and newer
- **Compatible with devices running Bluetooth® 4.0 technology and above**

Download the free WeighSync app from the Apple store (for IOS devices) or Google play (for Android devices).

To add new user profile:

1. Your BLUETOOTH® SMART SCALE will scan the mobile device automatically, please make sure the Bluetooth® setting is "ON" and your device is within 3-30 ft. of the scale.
2. Edit the user profile to set up your personal data, including activity levels and goal weight.
3. Proceed to the next step to store your user profile.
4. If you would like to change personal data, including activity levels and goal weight, simply edit the user profile again.
5. Step directly on to the platform to turn the scale on. Your real weight will appear on the scale, estimate daily calorie estimates, BMI and weight difference compared to goal weight will appear on the app.

Scan the QR code to download APP
