HOW TO USE

STEP 1: CLEANSE

To prep your skin for the most accurate skin analysis, first cleanse with LUNA™ play smart 2 to remove all dirt and bacteria from the skin to reveal its natural moisture level. After conducting your skin analysis, the FOREO For You app will proceed to sync a customized cleansing routine to your device for your next cleanse.

1. Dampen your skin and apply your regular face cleanser. Then dampen the device.
2. Cleanse using gentle circular movements on cheeks and forehead, gliding up and down the nose. LUNA™ play smart 2 will pause to tell you when to move to the next area of your face.
3. Rinse and pat your face dry. Wait an additional 2 minutes for your face to fully dry and then conduct your skin analysis. Afterwards, apply any other skincare products, as desired.

STEP 2: SKIN ANALYSIS

1. Open the FOREO For You app on your mobile device and turn on Bluetooth.
2. Turn on LUNA™ play smart 2 by holding the universal button until the light starts blinking. Now Bluetooth is connected and your device is ready to begin a smart skin analysis.
3. Press and hold the skin sensors on the back of the device to your cheeks, forehead, side of nose, and chin. When the app indicates, proceed to the next area.
- 4 The FOREO For You app will then analyze the moisture index of your skin, and instantaneously sync a customized cleansing routine to your device. Press and hold the universal button for 3 seconds to turn off device.

For best results, take your skin reading once a week at the same time of day, or when traveling to a new environment.
