Attention: Application Examiner / Review Engineer

**Subject: Request for a Class II Permissive Change**

FCC ID: 2AVYV-2547263-01  
Grant Date(s): 09/30/2020

Pursuant to CFR47 §2.1043, the Grantee hereby requests a Class II Permissive Change for the above identified device to address following performed modifications:

The modular type will be changed from “Single Modular” to “Limited Single Modular” because the modular approved transmitter with the above listed FCC ID is integrated by the Grantee into his own dedicated host device with FCC ID: 2AVYV-2554432-01 using a different antenna trace design than the originally certified one.

A new antenna (Inverted F-type PCB / max gain 2 dBi) is used for this host device.

The composite Bluetooth functionality (DSS GRANT) is deactivated via firmware for this host device.

Simultaneous transmission with the RF functionalities of the host device has been addressed.

There are no further changes made to the original product. There are no changes made to the transmitter circuitry and the above listed changes result in the same RF characteristics as in the original filing - therefore the not repeated test results continue to be representative of and applicable also to this modified device. There is neither an increase in the output power, nor a change of the RF Exposure condition or equipment class and there are no other changes to the device that indicate a need for a new FCC ID.

Sincerely,

Sabrina Berghahn  
Authorized Agent
