PRODUCT OVERVIEW

Components

01

SPECIFICATIONS

Model No.	PRO-4
Size	250* 117* 218 mm
Net Weight	1.42KG
Input	AC 100-240V 50/60HZ
Power	21W
Volume	2.2L
Coverage Area	<20m²

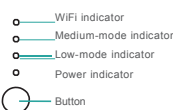

FUNCTION INSTRUCTION

Preparation Before Use

1. Open the cover and add appropriate water into the water tank, but the water should not exceed MAX water level.
2. Put back the cover and place the water tank on the housing and then connect the plug to the power socket,after the power indicator lights up white for about 1 second, the device enters standby state.
3. The WiFi indicator flashes quickly. If there is a paired device before, the WiFi indicator will be always on. If you need to re-pair, you need to press the button to flash the WiFi indicator.For more details, please see the "Smart Operation Instruction".

02

Button Function

1. Press the button, the power indicator will light white, the low-mode indicator will light green at the same time, and the green water level indicator will be on. The device starts to work in low mode.
2. Press the button again,the low-mode indicator light is off, the medium-mode indicator light is on, and the mist volume is switched to the medium mode.
3. Press the button for the third time, the low-mode indicator and the medium-mode indicator lights on, and the mist volume switches to high mode.
4. Press the button for the forth time, the low-mode indicator and the medium-mode indicator lights are off, then the device stops working and enters the standby state.
5. The product has humidity detection and control function. After the mobile phone enters the APP control interface, the mobile phone interface will display the current environmental humidity, and the humidity required to be humidified can be set in the APP interface. When the current ambient humidity reaches the set humidity, the humidification will be automatically stopped. When current ambient humidity below the set humidity, it will automatically begin to humidify.

Smart Operation Instruction

Works with smart life APP

1.Download & Registration

- Scan the QR code to download "Smart Life" APP. You can also search "Smart Life" in either APP store or Google Play to install the APP.
- Open the "Smart Life" APP, tap "Register" to register a "Smart Life" account with your phone number or E-mail. Then sign in the APP.

2.Add Devices in Easy Mode (Recommend)

Make sure your smart device is energized and your mobile phone is connected to your WiFi network. If the WiFi indicator of smart device keeps flashing to indicate that the smart device enters the mode of configuring the mobile phone; if not, please press the Button for more than 7 seconds, after hearing the smart devices "beep", then loose it and this means the device is already for configuration.

- Open your "Smart Life" APP and tap "+" on the top right of the APP. Select type of service device, tap "All devices" and turn to " Add Device", then automatically fetch the password of the WiFi network that your mobile phone connects to. Then tap "OK" to connect to the device.

04

- When appearing "Successfully added 1 device", it means the connection is complete and your device will be listed in your APP list.

3. Add Devices in AP Mode

- If failed in Easy Mode, users could also add devices in AP Mode.
- Press the Button for more than 7 seconds until hearing "beep" and the WiFi indicator light begin to flash quickly, then press the Button for another 7 seconds until hearing "beep" and the indicator light begin flash slowly, this means the device is already for configuration in the AP Mode.
- Tap "+" on the top right of the APP. Select Device Type and tap it. Then select "AP Mode" on the top right of the APP. Tap "Connect now" to go to the WLAN Settings interface in your mobile phone and select the WiFi network named "Smart Life_ XXXX" to connect it.
- Return to the "Smart Life" APP, the connection will start automatically.
- When appears "Successfully added 1 device", it means the connection is complete and your device will be listed in your APP list.

Now you can control your smart device via your mobile phone APP anytime and anywhere (Make sure your mobile phone and smart device are all connected to the network). You can share your devices with your friend or family after you add your devices successfully.

4. Q&A

(1) Why failed in adding device?

- a.Make sure the device is powered on and close to your mobile phone when adding device.
- b.Make sure your mobile phone is connected to the WiFi network and your WiFi router is working properly.
- c.Make sure the device is ready for configuration.Please refer to the Product Instruction "Add Devices in Easy Mode" or "Add Devices in AP Mode" for details.

05

- d.Make sure the connected devices have not reached the maximum number of WiFi router. If not, please disconnect the network of some devices.
- e.Make sure password of the WiFi network is correct when adding new device.
