Battery	186500-ion 2800mAh
Operating Time	9 hours 4 hold is (with AI vision sensor) 2 hours (with AI vision sensor & LED video light)
Bidirectional charging port (Type C) supports gimbal works while charging.	
Mechanical Range	° Pan: 320° ° Roll: 320° ° Tilt: 320°
Controllable Range	° Pan: 320° ° Tilt: -30°~+30°
Compatible Phones	Weight : <290g Thickness : ≤11 mm Width : 55mm~90mm

The motor would be shown in the screen due to some of mobile cameras are designed at the middle of phone, such as Xiaomi10, Xiaomi10 Pro, Xiaomi CC9 PRO.

FCC Statement:

Federal Communication Commission (FCC) Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement, The device can be used in portable exposure condition without restriction

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CE:

This device is operated the frequency bands and the maximum output power (E.I.R.P) :

2402MHz ~ 2480MHz : 6.51dBm

CAUTION RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF

USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

The adapter shall be installed near the equipment and shall be easily accessible.

the recommended output voltage/current of the adaptor is 5Vdc/1A.,and the adapter shall be CE approval type.

The suitable temperature for the product and accessories is -10℃ ~40℃ .
