

Solder Board-Component View 5	 A photograph showing a white flexible circuit board with several small electronic components (chips and capacitors) soldered onto it. The board is laid flat against a blue textured background. A vertical ruler on the left and a horizontal ruler at the bottom provide scale. The vertical ruler is marked from 1 to 21 cm, and the horizontal ruler is marked from 1 to 25 cm.
Solder Board-Component View 6	 A photograph showing a brown flexible circuit board with some electronic components soldered onto it. The board is laid flat against a blue textured background. A vertical ruler on the left and a horizontal ruler at the bottom provide scale. The vertical ruler is marked from 1 to 22 cm, and the horizontal ruler is marked from 1 to 26 cm.

Solder Board-Component View 7	 A photograph showing a black rectangular component, likely a battery, with blue solder applied to its top surface. The component is placed on a blue textured background. A metal ruler is positioned vertically to the left of the component, showing measurements from 1 to 12 mm. Another metal ruler is positioned horizontally below the component, showing measurements from 1 to 14 cm. The component has a white label with text: "WILLIYUNG 18650", "3.7V 4400mAh 1C-20W", and "20211127". A black cable with a white connector is attached to the top of the component.
Antenna View	 A photograph showing a green printed circuit board (PCB) with various electronic components. A black cable is connected to the PCB and extends upwards to a small black rectangular component labeled "BT Antenna". A red box highlights the "BT Antenna" component, and a red line points from the label to it. A metal ruler is positioned vertically to the left of the PCB, showing measurements from 1 to 21 mm. Another metal ruler is positioned horizontally below the PCB, showing measurements from 1 to 26 cm.
