

Exhibit 11: RF Exposure/Environmental Evaluation

The T-2000A is classified as a portable device; therefore, it is subject to the radiofrequency radiation exposure requirements specified in § 1.1307(b), 2.1091 and 2.1093 of this chapter, as appropriate. All equipment shall be considered to operate in a "general population/uncontrolled" environment. Applications for equipment authorization of devices operating under this section must contain a statement confirming compliance with these requirements for both fundamental emissions and unwanted emissions. Technical information showing the basis for this statement must be submitted to the Commission upon request.

Demonstration of Compliance:

The T-2000A is classified as a portable device. Therefore, the T-2000A is subject to routine environmental evaluation for RF exposure as per § 2.1093(c).

The University of Utah performed testing to demonstrate compliance to this section and the results of this test were sent as a separate pdf file.
