b-Vibe CARE

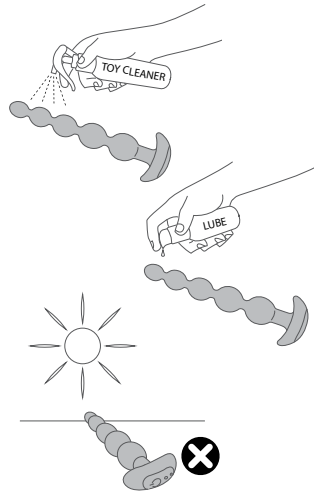

Cleaning, Storage & Safety

1. Always clean your anal beads thoroughly before and after each use.

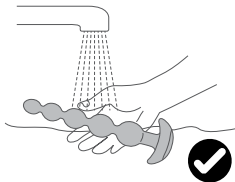

2. We recommend premium water-based lubricant. Silicone-based lubricants are not recommended and can cause damage to the product.

3. To properly clean your anal beads, wash with luke-warm water and a respected antibacterial soap. Rinse clean and pat dry using a lint-free cloth or towel. Do not use cleaners containing alcohol, petrol or acetone.

4. Avoid leaving your anal beads in direct sunlight and never expose it to extreme heat.

5. Our products are designed to be splash-proof. This means that a session in the shower or washing in running water will not cause damage, but prolonged exposure — such as using in the bath — would be harmful. **Do not fully submerge your anal beads in water.**

6. Never charge your anal beads while they are wet. Ensure that the charging pins on the base of the anal beads are completely dry before connecting to the charging cord.

If your anal beads appear to function abnormally, turn OFF and consult our customer care section on bvibe.com, where you will find help tips. Should you require further assistance please contact: customerservice@bvibe.com

Never charge your anal beads while they are wet.

DISPOSAL INFORMATION

Disposal of old electronic equipment (applicable in the EU and other European countries with separate waste collection systems):

The crossed-out dustbin symbol indicates that these items should not be treated as household waste, but rather brought to the appropriate collection point for recycling electrical and electronic equipment.

RADIO AND TELECOMMUNICATION TERMINAL EQUIPMENT (R&TTE)

Declaration of Conformity

Hereby, b-Vibe declares that this Cinco Anal beads product is in compliance with essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the Declaration of Conformity can be found at www.bvibe.com.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.
