FAQ

1.Poor sound quality

Please make sure the speaker and device is in effective transmission distance(32 feet) and there is no barrier between them.

2.BT can not be paired

Please ensure the both of the cell phone and speaker are in pairing

mode.If the blue indicator is not flashes quickly,please restart the speaker till it is.

Please ensure that there is no Aux-in cord is insert.Bluetooth is disconnected once with the Aux-in cord in.One speaker could be paired with one device once.That means that when you are going to pair the speaker with the second different device,you may have to turn BT of the previous one off or remove the speaker from the BT record.

### 3.Can not charge the speaker

Please change the other charging cord or use an AC adapter to have a try again.

### 4.Speaker shuts off automatically

Please ensure the power is full.The speaker will be powered off automatically 2 minutes if there is neither connecting nor working and will be powered off automatically 15 minutes if it is not working even though Bluetooth connected.Please restart the speaker if there is any occurrence happens above.

**FCC Caution.**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**Changes or modification warning**

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Information to the user.**

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

\* RF warning:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
