Re: Request for Confidentiality for FCC ID:LF57435

This filing for a Class II permissive change is to obtain confidential treatment for material in the current FCC file that is proprietary to Medtronic. Through an oversight, this material did not have a confidentiality request filed at the time of the original submission and thus is available to the public.

Pursuant to Sections 0.457(d)(1)(ii) and 0.459 of the Commission's Rules, Medtronic Incorporated (Applicant) hereby requests confidential treatment of information accompanying their submission for certification dated January 14, 1999 as specified below:

- Schematics
- Block Diagram

The above materials contain trade secrets and proprietary information not customarily released to the public. The public disclosure of these matters would be harmful to the Applicant and provide unjustified benefits to its competitors.

Sincerely,

Phillip Inglis  
Consultant to Medtronic Inc.
