

# INSTRUCTION MANUAL(Z6832)

Remote control car battery installation and charging instructions:. The remote control car uses 3.7V rechargeable battery (attached to the battery) to connect according to the correct method.. Cover the battery cover and tighten the lock.

## Remote control description:

●Excavator toy cars are toys that mimic the work of real excavators. Through various mechanical structures and functional designs, children need to coordinate their hand eye movements to control the movement and operation of toys during play, which helps to exercise their hand eye coordination and fine motor skills. Excavator toy cars can also stimulate children's imagination and creativity, encouraging them to create their own mining adventure stories.

# **FCC STATEMENT**

**1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:**

**(1) This device may not cause harmful interference, and**

**(2) This device must accept any interference received, including interference that may cause undesired operation.**

**2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.**

**NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.**

**This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:**

**Reorient or relocate the receiving antenna.**

**Increase the separation between the equipment and receiver.**

**Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**

**Consult the dealer or an experienced radio/TV technician for help.**

**RF warning statement:**

**The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.**
