## Regarding Requirements of Paragraph 15.212(a)(1)

## **Shielding 15.212(a)(1)(i)**

The oscillator/transmitter circuitry is housed under a metal shield soldered to the circuit board.

## Buffered Modulation/Data Input 15.212(a)(1)(ii)

All signals are buffered as required.

## Power Regulation 15.212(a)(1)(iii)

The RF components are powered by a locally regulated 3.1 V source.

## Antenna Construction 15.212(a)(1)(iv)

The antennas are manufacturer supplied with up to 4.0 dBi gain.

# **Test Configuration 15.212(a)(1)(v)**

The module was tested stand-alone without added shielding. Wiring exceeded 20 cm.

# **Labeling 15.212(a)(1)(vi)**

The module is labeled with the FCC ID using a permanently applied printed label as depicted in other supporting documentation. The user manual contains instructions for external labeling when the module is enclosed in a final configuration.

# Applicable Requirements on Final Configuration 15.212(a)(1)(vii)

The user manual includes instructions that explain the requirements of marking and the instructions that need to be conveyed to the final configuration.

# Compliance to RF Exposure Requirements in Final Configuration 15.212(a)(1)(viii)

The user manual includes instructions on the warnings required for the final configuration.
