

FCC RF EXPOSURE INFORMATION

Please read this information before use

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this device complies with the FCC guidelines and these international standards.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

All persons must be at least 20 cm from the antenna when the transmitter is operating and must not be co-located or operating in conjunction with any other antenna or transmitter in order to comply with FCC RF exposure requirements.
