

Commure Tag

The Commure Tag is a battery-powered, wearable Bluetooth device containing a single button used for medical situations.

With BLE tech and positioning technology, the beacon helps ensure immediate and effective response to your patients and staff emergency situations. So you can create a safer workplace environment for your patients and staff.

Features

- Raised, protective button edge to minimize accidental button presses
- Soft carbon-pill based, ergonomic button designed for comfort and durability
- Easily mounted
- Operational self-check feature
- Piezoelectric speaker used to provide audible feedback on alert trigger
- Flashing red light to indicate alert receipt by Cloud Services
- Minimal radio spectrum footprint

Specifications

Wireless	BLE 5.0
Power Consumption	< 15 μ A in normal mode < 200mA during alert mode
Operating temperature	-20° C to 60° C
Battery Type	CR2450
Battery Life	10 – 12 years
Dimensions & Material	45.6*38*12.2mm ABS
Waterproof	IP66
Certification	FCC

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
