

Title:

AirPort Base Station: Minimum Safe Operating Distance

Summary:

To operate within safety guidelines established by the FCC, you should locate an AirPort Base Station such that users are always at least 20 cm (7.8 in) from the unit.

How to:

To operate within safety guidelines established by the FCC, you should locate an AirPort Base Station such that users are always at least 20 cm (7.8 in) from the unit.

You should use wireless equipment in a way that minimizes human contact during normal operation. The AirPort Base Station is designed to be used at a distance greater than 20 cm (7.8 in).
