RE: Gemtek Technology

FCC ID: MXF-M930907

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) This device is a mini-PCI Module which is designed to be installed under the unlimited Modular Approval rules in a wide variety of devices. Consequently, the manual supplied is inadequate. What I am looking for is a Manual for OEM integrators giving instructions as to how to properly and safely install this device. Kindly provide a new Manual for this product.
- 2.) The temperature data presented in the Test Report appears to be in error. Does this device truly run off of 110VDC?
- 3.) How will this device be limited to indoor operations when operating in the 5.15-5.25GHz band? Please be sure your response to this item is also addressed in the Manual.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
