Wireless 2.4G Pairing

Wireless 2.4G mode supports Windows, Mac OS, Linux, Unix, Android and other systems.

Step 1: Scan the "Wireless 2.4G Mode" setting code:
After the setting is completed, the receiver that has been paired last time will be prioritized by default.

Wireless 2.4G Mode

Step 2: Scan the "One-click Pairing" setting code:
The blue light of the bar code flashes quickly and enters the 2.4G pairing state.

One-click Pairing

Step 3: Plug the receiver into the host (within 1 minute),hear a "Di", and the blue LED2 stays on. The connection is paired successfully.

Inspector:
This products meet the company's quality standards and industry standards, and the products are qualified.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
The device can be used in portable exposure condition without restriction.
