

WaveACCESS NET 2400 Antennas

WARNING:

The installer is also responsible for ensuring that the public is not exposed to radio frequency energy levels in excess of the FCC guidelines. Those guidelines imply that no human may conceivably be found within one foot of the front of the antenna. If such a situation is likely to occur, the installer is responsible for placing the appropriate caution signs to warn the public. Lucent Technologies, its agents, resellers, or distributors, are not liable for exposure to excessive RF energy levels due to improper antenna installation.

*The Maximum Permissible Exposure guidelines are 2 feet 4 inches (71 cm) for the **WaveACCESS NET** unit, as based on the National Council on Radiation Protection and Measurement (NCRP). If the antenna is in an accessible area, an appropriate warning sign **must** be installed in the appropriate place.*

WARNING:

*Using an antenna or cable other than those supplied or recommended for use with the **WaveACCESS NET** units, whether installed indoors or outdoors, could cause degradation of the system and could void your authority to operate this equipment. In addition, **the use of unauthorized antennas or external amplifiers violates Federal law and FCC's regulations**. This may void the Product Warranty, as well as expose the end user to legal and financial liabilities.*
