FCC ID: K3Y-24SX-001

Dear Mr. Coperich

Enclosed with this letter is our application for Certification of the radio system K3Y-24SX-001 Point to Multipoint described herein operating in the DEMS 24 GHz band. The above system has passed the proposed new mask outlined in the FCC NPRM Docket # 99-327 adopted November 4, 1999 and released November 10, 1999 and Erratum to the same rulemaking released December 23, 1999. Our system however has passed all the FCC Part 101 current requirements except for FCC Part 101.111 emission limits section.

Based on our discussion with Mr. Michael Pollak from FCC DC Office on March 30<sup>th</sup>, 2000, it has been agreed that a waiver for the current emission mask will be granted to Hughes Networks Systems under the condition that we pass the new proposed FCC emission limits. Therefore Hughes Networks Systems is asking for a waiver to operate their product in the 24 GHz DEMS service band. A similar waiver has been granted to NORTEL/TELIGENT to operate their product in the DEMS band.

The Files have been submitted electronically to the Federal Communications Commission Laboratory

If you have any further questions, please feel free to call me.

Regards
