Quick Operation Guide

Step 1 Download and install the App

Tips one: Scan the QR code below to download the APP.

Tris Home  
New version of APP(recommended)

Tips two: Search"Tris Home" in the App store and download.

Step 2 Turn on the power

Power on the camera, turn on the device, it will send "system starting up, wait be configured. Wait for the connection, please configure the network according to the Instructions" prompt after several seconds, if the camera does not have a prompt sound for a long time, you can press and hold the camera Reset button until you hear the prompt " Restore factory settings, please do not power off "and release it to restore the camera to factory settings and then configure the network.

Note:

If you need local storage, please install the memory card firstly, and then power on the device (the memory card does not support hot swapping, please plug and unplug the memory card when the device is powered off). Cloud storage is recommended, which is safe and convenient.

Step 3 Configure the network of the camera

- 1.Connect your phone to WiFi network.
- 2.Open the Tris Home app, register an account and login (Figure 1).
3. After successful login, Click the "+" button in the top right corner of the screen(Figure 2).

FCC CAUTION

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement  
To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Recorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
