### Description of charging indicator:

When the battery is in the charging status, the charging indicator is in red. When the battery is fully charged, the charging indicator is in green. When the battery volume is low:

- (1) a message indicating that the battery volume is less than 20% is displayed on the screen.
- (2) the device gives out a low battery prompt tone.
- (3) the charging indicator blinks in red.

### Tips

The following operations help obtain a longer standby duration of the device.

- Shorten the time to sleep by selecting Settings > Display > Sleep.
- Set the screen brightness to a small value by selecting Settings > Display > Brightness.
- Disable functions that are not frequently used, for example, GPS, Bluetooth, Wi-Fi and 3G communication.

## Use barcode scanning function

You need to open iScan application to scan, follow the instructions below:

1. Find out the iScan icon, click to open application;
2. Click "Enable barcode scan" blue side button to the right side, enable the scanning function (click again to disable function)
3. Press yellow scanning key to scan barcodes; Scanning indicator turns from red to blue along with a beep, means scanning successful.

### Note:

iScan is barcode scanning application, it's a default program, scanning function is enabled all the time, you can also download the latest iScan version on: <http://t.cn/8k5hWCo>.

\* For UHF function, please contact after-sales service for more information.

### FCC Warning

Specific Absorption Rate (SAR) information

SAR tests are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level.

although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

Before a device is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each device are performed in positions and locations as required by the FCC.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
