RE: Attestation regarding the use of Telit Module WE866C6.

Gentlemen:

The Bluetooth functionality of Telit Module WE866C6 is not used in this application. The module has the capability to disable the Bluetooth functionality via a command signal on Pin G6. Our firmware holds this functionality disabled, and the end user does not have any capability to enable the radio feature.

Sincerely,

Adam K. Paul  
Executive Engineer  
Next Century Submetering Systems, LLC.
