

Test Report: 5W57547 Issue 2

Applicant: Digital Security Controls Ltd
3301 Langstaff Road,
Vaughan, Ontario
L4K 4L2

Apparatus: F2-300 Series Motion Detectors

FCC ID: F5306F23X

In Accordance With: FCC Part 15 Subpart C, 15.245
Operation within the bands 902-928 MHz, 2435-
2465 MHz, 5785-5815 MHz, 10500-10550 MHz
and 24075-24175 MHz

Tested By: Nemko Canada Inc.
303 River Road
Ottawa, Ontario
K1V 1H2

Authorized By: 
Sim Jagpal, Resource Manager

Date: January 31, 2006

Total Number of Pages: 22

Report Summary

These tests were conducted on a sample of the equipment for the purpose of demonstrating compliance with Part 15, Subpart C. Radiated tests were conducted in accordance with ANSI C63.4-2003. Radiated emissions are made on an open area test site. A description of the test facility is on file with the FCC.

The assessment summary is as follows:

Apparatus Assessed:	F2-300 Series Motion Detectors
Specification:	FCC Part 15 Subpart C, 15.245
Compliance Status:	Complies
Exclusions:	None
Non-compliances:	None
Report Release History:	Issue 2 – Addition of 20dB bandwidth test results and AC Power line conducted results

Author: Jason Nixon, Telecom Specialist

Note that the results contained in this report relate only to the items tested and were obtained in the period between the date of initial receipt of samples and the date of issue of the report.

This test report has been completed in accordance with the requirements of ISO/IEC 17025.

Nemko Canada Inc. authorizes the applicant to reproduce this report provided it is reproduced in its entirety and for use by the company's employees only.

Any use which a third party makes of this report, or any reliance on or decisions to be made based on it, are the responsibility of such third parties. Nemko Canada Inc. accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

Section 1 : Equipment Under Test

1.1 Product Identification

The Equipment Under Test was identified as follows:

F2-300 Series Motion Detectors:

F2-301, F2-302, F2-303, F2-304, F2-305 and F2-306

1.2 Samples Submitted for Assessment

The following samples of the apparatus have been submitted for type assessment:

Sample No.	Description	Serial No.
3	Dual Technology Detector F2-303 Series	_____
4	Dual Technology Detector F2-304 Series	_____

The first samples were received on: December 13, 2005

1.3 Theory of Operation

Microwave Motion Sensor Module is developed applying Doppler Radar principle.

The role of Sensor Module is transmitting a low power Microwave from transmitting antenna and receiving the microwave energy reflected by objects to receiving antenna.

If the movement of the object is detected by the microwave motion sensor, the reflected microwave frequency is shifted away from the transmit frequency to receiving antenna.

The reflected and shifted microwave frequency is mixed with the transmit microwave frequency and results a low frequency voltage at the output of the sensor.

The Microwave Motion Sensor Module is designed with Dielectric Resonator Oscillator(DRO).

1.4 Technical Specifications of the EUT

Manufacturer:	Digital Security Controls Ltd.
Operating Frequency:	10.525GHz (F2-301, F2-303, F2-305 models) 10.515GHz (F2-302, F2-304, F2-306 models)
Emission Designator	P0N
Modulation:	On/Off
Antenna Data:	Integral
Power Source:	9-15Vdc

1.5 Block Diagram of the EUT

Section 2 : Test Conditions

2.1 Specifications

The apparatus was assessed against the following specifications:

FCC Part 15 Subpart C, 15.245

Operation within the bands 902-928 MHz, 2435-2465 MHz, 5785-5815 MHz, 10500-10550 MHz and 24075-24175 MHz

2.2 Deviations From Laboratory Test Procedures

No deviations were made from laboratory test procedures.

2.3 Test Environment

All tests were performed under the following environmental conditions:

Temperature range	:	15 – 30 °C
Humidity range	:	20 - 75 %
Pressure range	:	86 - 106 kPa
Power supply range	:	+/- 5% of rated voltages

2.4 Test Equipment

Equipment	Manufacturer	Model No.	Asset/Serial No.	Last Cal.	Next Cal.
Spectrum Analyzer	Hewlett-Packard	8565E	FA000981	March 10/05	March 10/06

NCR – No Cal Required

COU – Cal on Use

Section 3 : Observations

3.1 Modifications Performed During Assessment

No modifications were performed during assessment.

3.2 Record Of Technical Judgements

The following technical Judgement was made during this assessment:

3.2.1 Technical Judgement 1

The difference between the models of the F2-300 series Motion Detectors is the populated features. The F2-301 and F2-302 have PIR and/or MW detector, the F2-303 and F2-304 have PIR and MW detector and the F2-305 and F2-306 have PIR and MW detector with microphone. It was judged that testing performed on one of each frequency would be representative of all models.

3.3 EUT Parameters Affecting Compliance

The user of the apparatus could not alter parameters that would affect compliance.

3.4 Test Deleted

No Tests were deleted from this assessment.

3.5 Additional Observations

There were no additional observations made during this assessment.

Section 4 : Results Summary

This section contains the following:

FCC Part 15 Subpart C : Test Results

The column headed 'Required' indicates whether the associated clauses were invoked for the apparatus under test. The following abbreviations are used:

- N No : not applicable / not relevant.
- Y Yes : Mandatory i.e. the apparatus shall conform to these tests.
- N/T Not Tested, mandatory but not assessed. (See section 3.4 Test deleted)

The results contained in this section are representative of the operation of the apparatus as originally submitted.

4.1 FCC Part 15 Subpart C : Test Results

Part 15	Test Description	Required	Result
15.207(a)	Powerline Conducted Emissions	Y	PASS
15.209(a)	Radiated Emissions within Restricted Bands	N (2)	
15.245(b)	Radiated emissions not in Restricted Bands	Y	PASS

Notes:

- (1) EUT is DC powered
- (2) The apparatus does not have any harmonics that fall within the restricted bands below 17.7GHz.

Appendix A : Test Results

Clause 15.207(a) Powerline Conducted Emissions

Frequency of Conducted limit (dBmV)		
Emission (MHz)	Quasi-peak	Average
0.15-0.5	66 to 56*	56 to 46*
0.5-5	56	46
5-30	60	50
* Decreases with the logarithm of the frequency.		

Test Conditions:

Sample Number:	10	Temperature:	22
Date:	January 12, 2006	Humidity:	30
Modification State:	0	Tester:	Jason Nixon
		Laboratory:	Shielded Room

Test Results: See Attached Plots and Tables.

Additional Observations:

All plots were performed using a peak detector and compared to the average limit.

Block Diagram:

10.525GHz Transmitter – Phase

Clause 15.245(b) Radiated emissions not in Restricted Bands

Except as provided in paragraph (b) of this section, the field strength of emissions from intentional radiators operated within these frequency bands shall comply with the following:

Fundamental Frequency	Field Strength of Fundamental (millivolts/meter)	Field Strength of Harmonics (millivolts/meter)
902-928	500	1.6
2435-2465	500	1.6
5785-5815	500	1.6
10500-10550	2500	25.0
24075-24175	2500	25.0

Test Conditions:

Sample Number:	3,4	Temperature:	25°C
Date:	December 15, 2005	Humidity:	10%
Modification State:	0	Tester:	Jason Nixon
		Laboratory:	Telecom 2

Test Results: See attached Table

Additional Observations:

The Spectrum was searched from 30MHz to the 53GHz.

The EUT was measured on three orthogonal axis.

All measurements below 40GHz were performed at 1m and then corrected to 3m. All measurements above 40GHz were performed at 30cm and corrected to 3m.

The supply voltage was varied from 9Vdc to 15Vdc and no change in transmit field strength was observed.
