Limited Modular Approval Letter

Mar.23.2016

Dear Application Examiner:

Advanced Card Systems Limited, is submitting this application for certification of their Smart Card Reader Module under FCC ID: V5MACM1251. It is seeking limited modular approval. The radio meets most of the requirements for modular approval as detailed in FCC 15.212. Compliance to each of the requirements is described below:

1. **“The modular transmitter must have its own RF shielding.”**

The radio portion of the module doesn't have its own RF shielding. The reason due to the RF shielding cause the reading performance not well. This is one reason for limited modular approval.

2. **“The modular transmitter must have buffered modulation/data inputs.”**

The EUT has buffered data inputs to insure compliance with Part 15 requirements under conditions of excessive data rates or over modulation. Please see the Schematics exhibit.

3. **“The modular transmitter must have its own power supply regulation.”**

The EUT has its own power supply regulation to insure compliance with Part 15 requirements regardless of the quality or level of external DC supplying the module from the host unit. Please see Schematics exhibit. Also, the technical report exhibit contains AC power line conducted emissions data taken with the EUT powered from a linear power supply that contains no EMC suppression components.

4. **“The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c).”**

The EUT will be professionally installed and therefore meets the FCC antenna requirements. Please see Antenna information exhibit, user manual exhibit, and internal photos exhibit.

5. **“The modular transmitter must be tested in a stand-alone configuration.”**

The EUT was tested in a stand-alone configuration, please refer to setup photos exhibit for details.

6. **“The modular transmitter must be labeled with its own FCC ID number.”**

The module will be labeled with its own FCC ID number. Please see FCC ID label & location exhibit

7. **“The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.”**

The necessary explanation to be complied with this requirement is contained in the use manual, and please refers to the Use manual.

8. **“The modular transmitter must comply with any applicable RF exposure requirements.”**

It was confirmed that this device is a low power TX and RF exposure can be exempted.
