<div>TWS5.3 Bluetooth headset user manual</div> <div></div> <div>6</div>	<div>ights of the two earphones are all off. Operation steps of single ear use: take out any earphone from the charging compartment, the red and blue lights of the headset will flash alternately. At this time, open the mobile phone Bluetooth to search and connect. After successful connection, the headset will not flash during the use. Call voice assistant: after the standby process, long press for 2 seconds to wake up the mobile phone voice assistant (SIRI) function. Master and slave switching operation: After the TWS headset group success, it can be used separately regardless of the main and secondary headphones (such as one headset has no power or is in the charging state, which does not affect the normal use of the other headset), and the two headphones can be used alternately as the main voice channel. Bluetooth connection operation: Bluetooth has been successfully paired with the</div> <div>7</div>
<div>operation declaration: Special note: after the first use or 1 hour after the headset is in the storage, it is necessary to take out the headset and put it back in the charging compartment to wake up the headset, so as to realize the function of automatically starting the headset out of the warehouse. When the earphone leaves the factory, the left and right ear groups have been paired. If the left and right ears cannot form a group, and if the right and left ears cannot form a group, please operate as follows: Procedures of both ears: the two headphones are turned on at the same time, the white and blue lights flicker alternately for about 5 seconds, the left and right headphones are automatically connected to each other, and the TWS team is successful. The red and blue lights of the main earphone flash. When the secondary earphone light is not on, open the mobile phone's Bluetooth to search and connect. After the connection is successful, the indicator l-</div> <div>8</div>	<div>phone, the phone has not delete the connection information (matching name), the headset can be automatically connected to the phone (or the headset is put in the charging compartment, and then take out the headset will automatically connect back to the phone). Headphone charging: When the headset is put into the charging compartment, the digital display of the charging compartment will light up, and the red light of the headset is always on, indicating that the headset is charging. After fully charged, the red light of the headset is off, and the digital display of the charging compartment is off.</div> <div>9</div>
	<div>pairing mode: automatic pairing Boot prompt sound:power on Shutdown prompt sound: power off Group pair status prompt: Du Successful connection: connected Low power prompt: low power supply Touch function: Power on: Long press for 3 seconds Shutdown: long press for 5 seconds Pause / play: Click on any headset Answer / hang up calls: Click any headset Call to refuse to receive:Long press 2S Volume plus: double-click on the right headset Volume reduction: Double-click on the left headset Last song: three click left earphone Next song: three click right earphone Voice assistant SIRI: Long press for 2 seconds to go No standby connection: 5 minutes automatic shutdown</div> <div>10</div>
	<div>FCG Warning Statement: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. FCC Radiation Exposure Statement The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.</div>
