

### Conducted Emission

## A photograph of a large circular anechoic chamber. The interior walls are covered with white, pyramid-shaped electromagnetic wave absorbers designed to eliminate reflections. In the center of the chamber, a small wooden table holds a device, possibly a sensor or antenna. A large black circular frame is positioned in front of the table, likely for mounting or measurement purposes. The floor is a smooth, reflective surface.

## **7. External and Internal Photos of the EUT**
