Request for Modular/Limited Modular Approval

Subject: Manufacturer's Declaration for		☑ - Modular Approval☐ - Limited Modular Approval	□ - Split Modular Approval□ - Limited Split Modular Approval		roval
Confi	dentiality Request for FCC ID: HLZB	E200NG			
		Basic Requirements – FCC Part 15.212 e Limited Module Description Must be		owing Pages	
		Approval Requirement			ment Met
1.	The modular transmitter must have its own RF shielding. This is intended to ensure that the module does not have to rely upon the shielding provided by the device into which it is installed in order for all modular transmitter emissions to comply with FCC limits. It is also intended to prevent coupling between the RF circuitry of the module and any wires or circuits in the device into which the module is installed. Such coupling may result in non-compliant operation. The physical crystal and tuning capacitors may be located external to the shielded radio elements. 15.212(a)(1)(i)		∑ - YES	□ - NO(*)	
	Details: <example a="" all="" and="" antenna="" board="" circuitry.="" components="" connector="" contains="" covers="" is="" located="" metal="" module="" next="" of="" on="" rf="" shield="" the="" to="" top="" which="" –=""></example>				
2.	The modular transmitter must have buffe ensure that the module will comply with lor over-modulation. 15.212(a)(1)(ii)			⊠ - YES	□ - NO(*)
	Details: <example application="" as="" buffered="" circuit="" data="" described="" description="" in="" is="" modulation="" operational="" provided="" the="" to="" with="" –=""></example>				
3.	The modular transmitter must have its ow to ensure that the module will comply wit supplying circuitry in the device into whic	h FCC requirements regardless of the o	design of the power	⊠ - YES	□ - NO(*)
	Details: <example application="" contains="" filed="" its="" module="" own="" please="" power="" refer="" regulation.="" schematic="" supply="" the="" this="" to="" with="" –=""></example>				
4.	The modular transmitter must comply wit §§ 15.203, 15.204(b), 15.204(c), 15.212(a attached or employ a "unique" antenna cantenna, including the cable). The "profesto modules but can apply to limited modules."), and 2.929(b). The antenna must either coupler (at all connections between the ssional installation" provision of § 15.2	er be permanently e module and the 03 is not applicable	⊠ - YES	□ - NO(*)
	Details: <example a="" an="" and="" antenna="" antennas="" application="" approved="" be="" connector="" connector.="" connects="" considered="" device="" found="" in="" is="" its="" list="" manual="" may="" module="" non-standard="" of="" provided="" tested="" the="" this="" to="" ufl="" users="" using="" which="" with="" –=""></example>				
5.	The modular transmitter must be tested i inside another device during testing. This complying with Part 15 emission limits regunders the transmitter module will be bat requirements found in Section 15.207. ACT the module must not contain ferrites, unl 15.27(a)). The length of these lines shall be at least 10 centimeters to insure that ther supporting equipment. Any accessories, puring testing shall be unmodified or compared to the same of the sam	is intended to demonstrate that the magardless of the device into which it is extery powered, it must comply with the for DC power lines and data input/outpess they will be marketed with the mode length typical of actual use or, if that is no coupling between the case of the eripherals, or support equipment connections.	odule is capable of ventually installed. AC line conducted put lines connected to dule (see Section length is unknown, the module and nected to the module	⊠ - YES	□ - NO(*)

Details: <example - The module was tested stand-alone as shown in test setup photographs filed with this application>

	Modular Approval Requirement	Requirement Met	
6.	The modular transmitter must be labeled with its own FCC ID number, or use an electron display (see KDB Publication 784748). If using a permanently affixed label with its own FCC ID number, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1." or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 15.212(a)(1)(vi)	⊠ - YES	□ - NO(*)
	Details: <example .filed="" a="" app="" application.="" are="" as="" exhibit="" filed="" in="" installation="" instructions="" is="" label="" labeling="" manual="" module="" on="" shown="" the="" there="" this="" with="" –=""></example>	lication. Host	specific
7.	The modular transmitter must comply with all specific rule or operating requirements applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee. A copy of these instructions must be included in the application for equipment authorization. For example, there are very strict operational and timing requirements that must be met before a transmitter is authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation under Section 15.231(e), in which case there are separate field strength level and timing requirements. Compliance with these requirements must be assured. 15.212(a)(1)(vii)	⊠ - YES	□ - NO(*)
	Details: <example 15c="" application.="" complies="" fcc="" filed="" in="" installation="" instructions="" manual="" module="" oem="" part="" requirements.="" the="" this="" to="" with="" –=""></example>	nstaller are pr	ovided in the
8.	The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4). Modular transmitters approved under other Sections of Part 15, when necessary, may also need to address certain RF Exposure concerns, typically by providing specific installation and operating instructions for users, installers and other interested parties to ensure compliance. 15.212(a)(1)(viii)	⊠ - YES	□ - NO(*)
	Details: <example application.="" as="" exclusion="" exposure="" in="" informa="" levels="" meets="" module="" portable="" rf="" shown="" the="" –=""></example>	tion filed with	ı this

Limited Module Description – When Applicable

* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end

product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here.

Details: <example - N/A>

Software Considerations – KDB 594280 / KDB 442812 (One of the following 2 items must be applied)			
	Requirement	Requirement Met	
1.	For <u>non-Software Defined Radio</u> transmitter modules where software is used to ensure compliance of the device, technical description must be provided about how such control is implemented to ensure prevention of third-party modification; see KDB Publication 594280. Details: <example adjusted="" be="" by="" can="" device="" firmware="" modified="" not="" of="" or="" th="" the="" the<="" –=""><th>□ - Provided in Separate Cover Letter</th><th>- N/A</th></example>	□ - Provided in Separate Cover Letter	- N/A
	letter filed with this application. >	e ena user us described in a se	purate cover
2.	For <u>Software Defined Radio (SDR)</u> devices, transmitter module applications must provide a software security description; see KDB Publication 442812.	☐ - Provided in Separate Cover Letter	⊠ - N/A
	Details: <example a="" –n=""></example>		

Split Modular Requirements				
Requirement Provided in Manual				
 For split modular transmitters, specific descriptions for secure communications between front-end and control sections, including authentication and restrictions on third-party modifications; also, instructions to third-party integrators on how control is maintained. 	☐ - Provided in Separate Cover Letter	⊠ - N/A		
Details: <example a="" n="" –=""></example>				

OEM Integration Manual Guidance - KDB 996369 D03 Section 2

Clear and Specific Instructions Describing the Conditions, Limitations, and Procedures for third-parties to use and/or integrate the module into a host device. Requirement If No, and LMA applies, the applicant can optionally choose to not make the following detailed info public. However there still needs to be basic integration instructions for a users manual and the Is this module intended for - YES information below must still be included in the operational sale to third parties? description. If the applicant wishes to keep this info confidential, this will require a separate statement cover letter explaining the module is not for sale to third parties and that integration instructions are internal confidential documents.

Items required to be in the manual – See KDB 996369 D03, Section 2

As of May 1, 2019, the FCC requires ALL the following information to be in the installation manual. Modular transmitter applicants should include information in their instructions for all these items indicating clearly when they are not applicable. For example information on trace antenna design could indicate "Not Applicable". Also if a module is limited to only a grantees own products and not intended for sale to third parties, the user instructions may not need to be detailed and the following items can be placed in the operational description, but this should include a cover letter as cited above.

- 1. List of applicable FCC rules. KDB 996369 D03, Section 2.2 Only list rules related to the transmitter.
- Summarize the specific operational use conditions. KDB 996369 D03, Section 2.3
 - Conditions such as limits on antennas, cable loss, reduction of power for point to point systems, professional installation info
- 3. Limited Module Procedures. KDB 996369 D03, Section 2.4

 □ - All Items shown to the left are provided in the Modular Integration Guide (or UM) for Full Modular Approval (MA)

	a.	Describe alternative means that the grantee us	ses to verify the host meets the necessary	or LMA.
		limiting conditions		
	b.	When RF exposure evaluation is necessary, sta	te how control will be maintained such	\square - An LMA applies and
		that compliance is ensured, such as Class II for	new hosts, etc.	is approved ONLY for
4.	Trace antenn	a designs. KDB 996369 D03, Section 2.5		use by the grantee in
	a.	Layout of trace design, parts list, antenna, con	nectors, isolation requirements, tests for	their own products, and
		design verification, and production test proced	ures for ensuring compliance. If	not intended for sale to
		confidential, the method used to keep confide	ntial must be identified and information	3 rd parties as provided in
		provided in the operational description.		a separate cover letter.
5.	RF exposure	considerations. KDB 996369 D03, Section 2.6		Therefore the
	a.	Clearly and explicitly state conditions that allow	w host manufacturers to use the module.	information shown to
		Two types of instructions are necessary: first to	the host manufacturer to define	the left is found in the
		conditions (mobile, portable – xx cm from body	y) and second additional text needed to	theory of operation.
		be provided to the end user in the host produc	t manuals.	
6.	Antennas. KD	B 996369 D03, Section 2.7		
	a.	List of antennas included in the application and	d all applicable professional installer	
		instructions when applicable. The antenna list	shall also identify the antenna types	
		(monopole, PIFA, dipole, etc – note that "omni	-directional" is not considered a type)	
7.	7. Label and compliance information. KDB 996369 D03, Section 2.8			
	a.	Advice to host integrators that they need to pr	ovide a physical or e-label stating	
		"Contains FCC ID: " with their finished product		
8.	Information of	on test modes and additional testing requiremen	ts. KDB 996369 D03, Section 2.9	
	a.	Test modes that should be taken into consider	ation by host integrators including	
		clarifications necessary for stand-alone and sin	nultaneous configurations.	
	b.	Provide information on how to configure test r	nodes for evaluation	
9.	Additional te	sting, Part 15 Subpart B disclaimer. KDB 996369	D03, Section 2.10
