Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, identified as View 3. The component is rectangular with a complex layout of electronic components, including resistors, capacitors, and integrated circuits. It is positioned on a blue textured surface. A black ruler is placed vertically to the left of the component, and a silver ruler is placed horizontally below it. The black ruler shows a red '10' mark, and the silver ruler shows a red '10' mark. The component is oriented horizontally, with its longer side parallel to the silver ruler.
Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, identified as View 4. The component is circular with a central hole and a complex layout of electronic components, including resistors, capacitors, and integrated circuits. It is positioned on a blue textured surface. A black ruler is placed vertically to the left of the component, and a silver ruler is placed horizontally below it. The black ruler shows a red '10' mark, and the silver ruler shows a red '10' mark. The component is oriented vertically, with its longer side parallel to the silver ruler.

Solder Board-Component View 7	 A photograph of a small green printed circuit board (PCB) component with a white multi-pin connector and two silver solder tabs. The component is placed on a blue textured surface next to a metal ruler for scale. The ruler shows markings from 1 to 10 mm.
Solder Board-Component View 8	 A photograph of a small green printed circuit board (PCB) component with a circular shape and a gold-colored tab. The component is placed on a blue textured surface next to a metal ruler for scale. The ruler shows markings from 1 to 8 mm.
