Professional Installation Statement

This statement is submitted with regards to professional installation of the P-LPWA-900 radios and the antennas used for testing. The P-LPWA-900 radios must be professionally installed and so is exempt from the antenna restrictions of FCC Part 15.203. The P-LPWA-900 is a product manufactured by Cisco Systems, Inc. San Jose.

The P-LPWA-900 is to be certified for operation under Part 15.247 of the FCC Rules in 900-928MHz band. The equipment is designed for long range protocol LoRAWAN communications and will carry data signals using Ethernet interfaces.

Due to the unique technical expertise required in installing and setting up the system, the product is not suitable for distribution to retail channels. It also instructs its resellers not to sell the units that require external antennas to retail channels to be compliant with FCC regulations.

The P-LPWA-900 radio will be used for fixed, permanent, or temporary, outdoor environment. Professional installers will be needed to deploy this equipment and their antennas. The method of antenna installation is described in the Hardware Installation guide written for use by professionally trained installers.

At the time of sale, the installation engineer chooses from commercially available antennas listed in our user manual for use with the radio. Only those antenna(s) listed in the filing are to be used

Sincerely,

Ronak Patel Title: Compliance Engineer
