

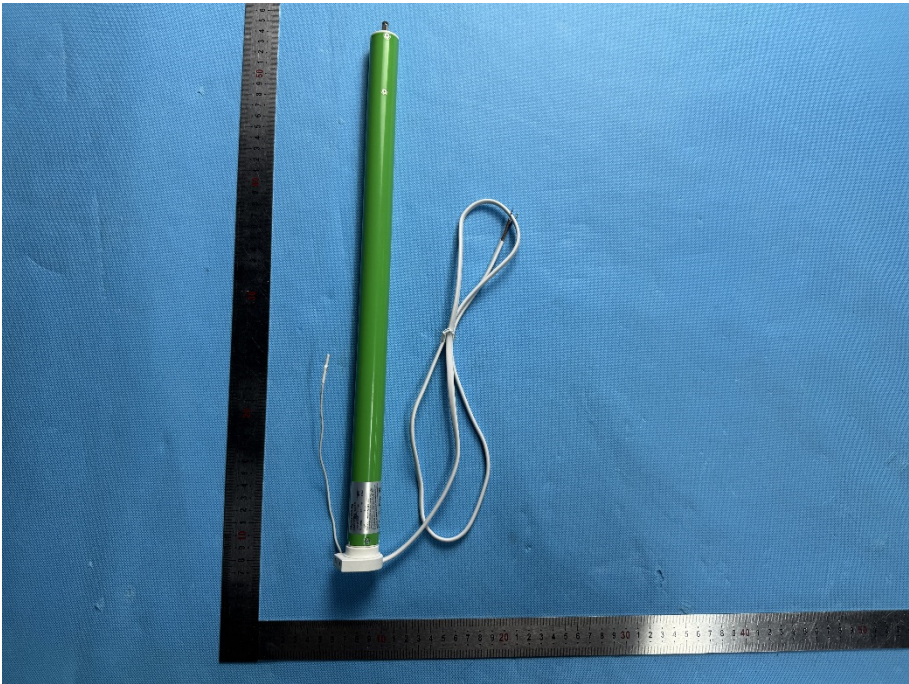

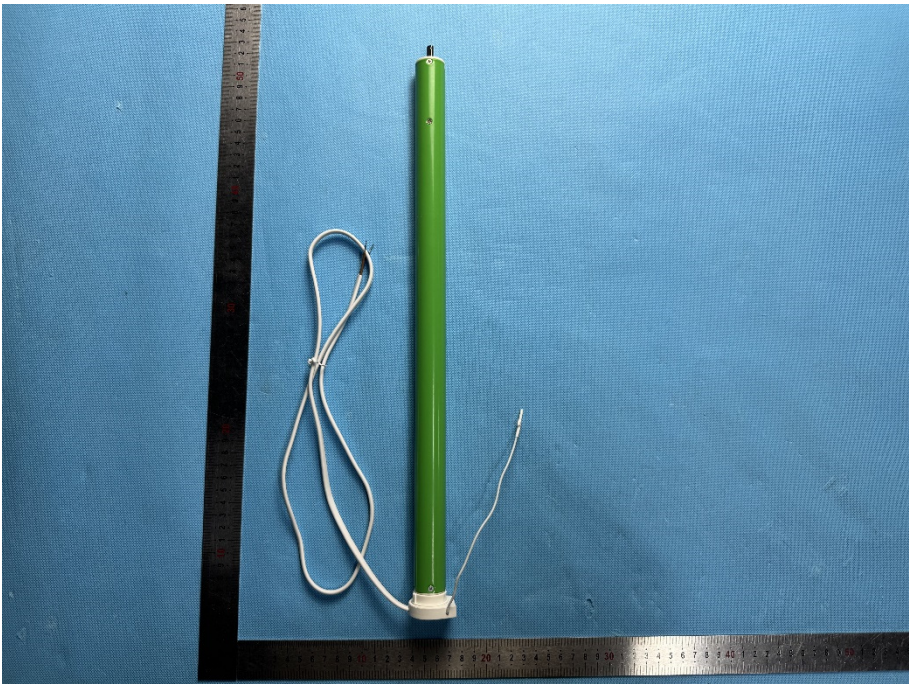

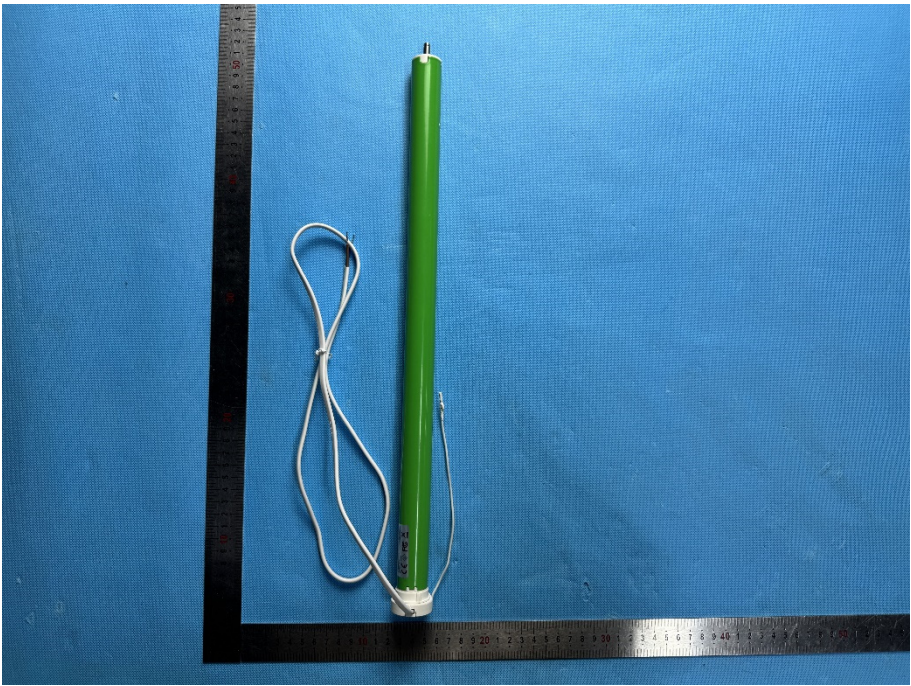

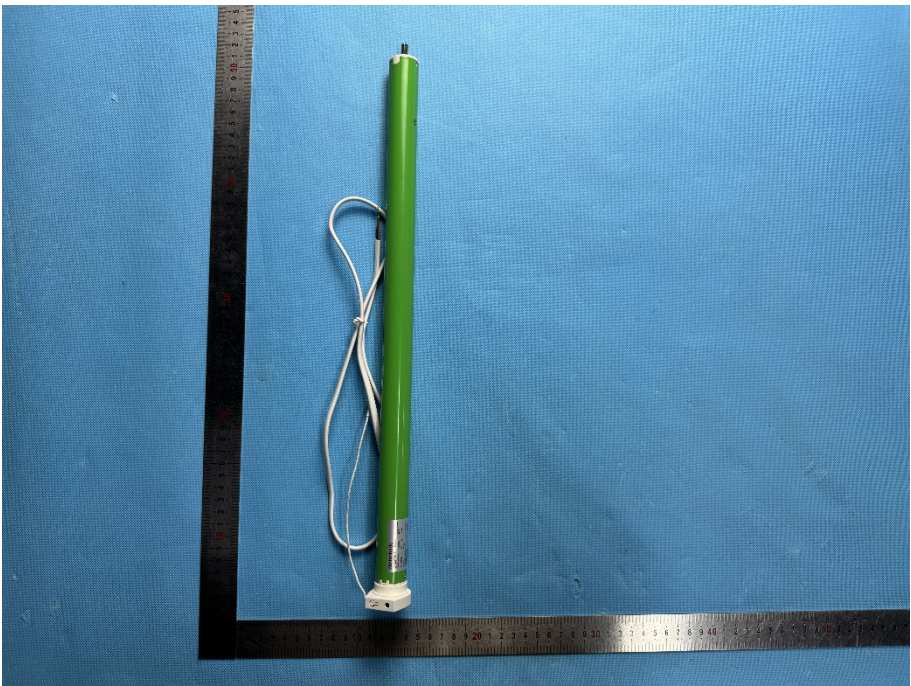

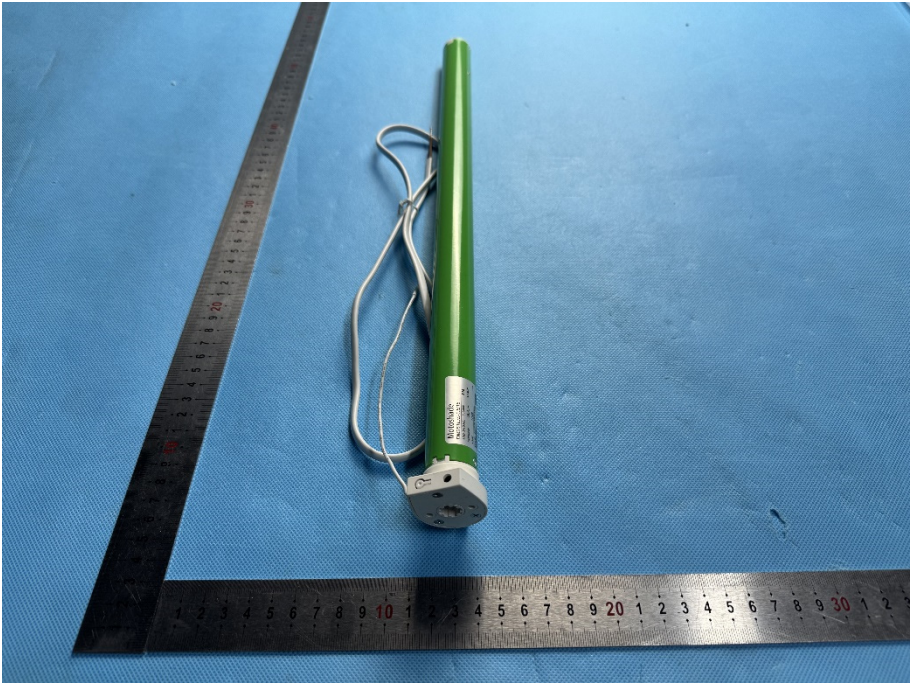

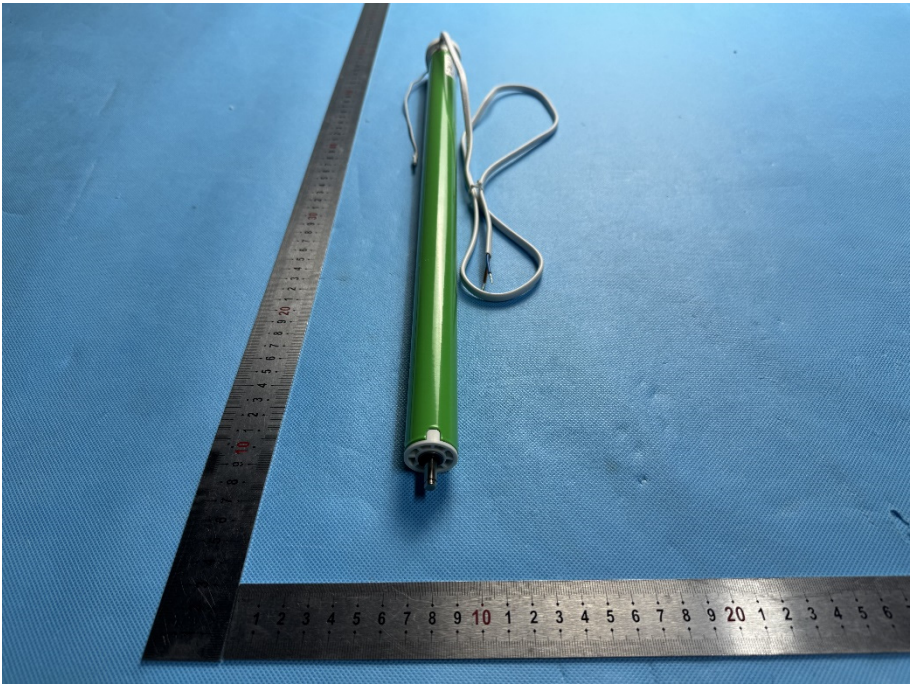

EXHIBIT 2 - EUT EXTERNAL PHOTOGRAPHS

EUT View 1	 A photograph showing a green cylindrical device (EUT) with a white cable attached to its bottom. The device is positioned vertically next to a black ruler on a blue background. The ruler is placed horizontally, with the device's length spanning from approximately 10 cm to 30 cm. The white cable is coiled to the right of the device.
EUT View 2	 A photograph showing the same green cylindrical device (EUT) with a white cable attached to its bottom. The device is positioned vertically next to a black ruler on a blue background. The ruler is placed horizontally, with the device's length spanning from approximately 10 cm to 30 cm. The white cable is coiled to the left of the device.

EUT View 3	 A photograph showing a green cylindrical device (EUT) with a white cable attached to its bottom. The device is positioned vertically next to a black ruler on a blue background. The ruler is marked in centimeters and millimeters. The device is approximately 15 cm long. The white cable is coiled around the bottom of the device.
EUT View 4	 A photograph showing the same green cylindrical device (EUT) with a white cable attached to its bottom. The device is positioned vertically next to a black ruler on a blue background. The ruler is marked in centimeters and millimeters. The device is approximately 15 cm long. The white cable is coiled around the bottom of the device.
