

### **Internal Photo Permanent Confidentiality**

- a) Describe in detail how internal photos and/or user's manual information are controlled to prevent them from becoming public or disclosed to unauthorized persons.

R. Photos of the Gen 7 Flex raw printed circuit board will not be included in the user manual and will not be available to the public.

- b) Describe how public access is restricted for products serviceable by professional designated technicians.

R. Public access will be restricted due to the encapsulation process of the Gen 7 Flex assembly process. Try to access the internal circuit board will require a dissolving process which will destroy the board/all components during the process of disassembly. There are no designated technicians to work on these blast gauges. They are either discarded or returned to Blackbox Biometrics via RMA for destruction.

- c) A statement that all sales of the non-consumer device will be under an NDA to include third party sales, and that the final user of the device is subject to the NDA.

R. We don't have or require the need for an NDA. All of our sales are public and are commercialized.

- d) Provide an example of the NDA between the grantee and a purchaser. The request for confidentiality must include the key terms of the NDA to ensure consistency between the two.

R. We don't have or require the need for an NDA. All of our sales are public and are commercialized.
