

CONNECTDER CELL CARRIER PARTS LIST AND TUNE-UP PROCEDURE

Parts List:

SMART ConnectDER Host Device
ConnectDER Modem Backer and Comms Cradle
Molex 209142-0180 Antenna
ConnectDER Cell Carrier Card
CAT-M1 SIM Card

Tune-Up Procedure:

During manufacturing and assembly each module is set and tested at default levels. The manufacturing test procedure is powering on the SMART ConnectDER unit and allowing the module to connect to the Verizon LTE network and phone in to the ConnectDER Cloud. There is no field tune-up procedure. In the event of an issue the entire unit would need to be replaced.
