Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

To whom it may concern:

LSI Industries Inc hereby requests a Permissive Change Class II of the radio equipment certification for the BMD-341 certification number, FCC ID: 2AWNNBMD341. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – There are no changes to this section.
- (b) Functional capabilities. –There are no changes to this section.
- (c) Antenna Characteristics. – A new antenna will be used with the u-box BMD341 module
- (d) Cosmetic differences – There are no changes to this section.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Chris Papa  
Sr. Vice President - Engineering  
LSI Industries Inc.
