Federal Communications Commission  
EQUIPMENT AUTHORIZATION BRANCH  
7435 Oakland Mills Road  
Columbia, MD 21046

Dear Sirs:

The tuning procedure for the EF Johnson Technologies mobile radio identified by FCC identifier ATH2425M70 is accomplished by connection of the radio to a Personal Computer running the EF Johnson Viking Tune program. The procedure is automated, with the operator following the computer generated instructions. Connection of the radio to the computer is given in section 4 of the radio service manual.

The transmitter power tuning target is 27.5 Watt  $\pm$ 2.5 Watts for the 700 MHz band. The transmitter power tuning target is 32.5 Watts  $\pm$ 2.5 Watts for the 800 MHz band.

Sincerely,

John Oblak  
VP, Standards and Regulatory Affairs  
EF Johnson Technologies
