E-labeling information as in KDB784748 D02

FCC ID: APYHRO00242

To whom it may concern

We inform the following KDB594280 D02 E-Labeling Guidance.

A. Information to be displayed

1. The information that will be displayed on the e-label and information that will remain in the user manual is shown below:

Information	on E-label	In Manual
FCC ID number	Yes	
DoC logo	N/A	
15.19 statement (“This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.”)	->	Yes
Class A / B Digital Device user manual statements ¹	->	Yes
DoC declaration ¹	N/A	N/A
Caution to the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment ¹	->	Yes
Describe any other FCC regulatory information included in e-label ¹	N/A	
¹ If the e-label includes information typically included in the manual then the e-label shall clearly differentiate between information required to be on the device's surface and information required to be in the manual – refer to 784748 D02 e labelling v01 section II D 3(b)		

Images of the e-label screen are provided below:

Please refer to the “08_FCC-ID_Location” document. And the Part15B(JBP) is included in the FCC ID certification.

B. Access to the required information on the e-label

1. Users are able to access the information in no more than three steps in a device's menu. The actual steps are:

Please refer to the [“03_Declaration FCC ID label visibility”](#) document regarding the detail (displayed in Japanese mode).

Users need to operate only three steps as below

1. Tap the **“Settings”** icon in the status bar.
2. Tap the **“About phone”** in the **“Settings”** menu.
3. Tap the **“Authentication”** in the **“About phone”** menu.

No special access codes or permissions are required to go through the above steps beyond entering a user-defined password to protect against unauthorized access to the device.

2. The information is stored on the device, no special accessories or supplemental plug-ins (*e.g.*, a SIM/USIM card) are required to access the information.
3. Users are provided specific instructions on how to access the information. The information is provided in the [page 97 of “12_UserManual_draft”](#) document.

C. Labeling for Importation and Purchasing

Products utilizing e-labels are required to have a physical label on the product at the time of importation, marketing and sales. For devices imported in bulk and not packaged individually, a removable adhesive label or, for devices in protective bags, a label on the bags is acceptable for this purpose. Any removable label shall be of a type intended to survive normal shipping and handling and must only be removed by the customer after purchase. For devices imported already in individual packages ready for sale, the information may alternatively be provided on the package. It shall contain:

1. The FCC ID and/or the DoC logo (if applicable); and
2. Any other information required by specific rule to be provided on the surface of the product unless such information is permitted to be included in the User's manual or other packaging inserts.

Please refer to the [“8_FCC-ID_Location”](#) document. The FCC ID is displayed on the individual packages ready for sale.

D. Other considerations

1. The above information must be programmed by the responsible party and the information must be secured in such a manner that third-parties cannot modify it.

The users/third-parties cannot modify FCC ID information in the phone and FCC ID information is pre-programmed by SHARP.

2. All the applicable regulatory information required on the packaging or user instructions must be provided according to the rules even if it is displayed electronically. For example, hearing aid compatibility (HAC) ratings for the phones as specified in 47 C.F.R. § 20.19.

The information required by the applicable FCC rule exists in the user manual.
