

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the disassembled components of the EUT. On the left is the white plastic housing with a small opening. In the center is the white plastic back cover with four screws. On the right is a small, circular, silver-colored component. A black ruler with white markings is placed horizontally below the components for scale.
EUT Housing and Board View 2	 This photograph shows the internal components of the EUT. On the left is the green printed circuit board (PCB) with various electronic components, including a large circular inductor. On the right is the white plastic back cover. A black ruler with white markings is placed horizontally below the components for scale.

EUT Housing and Board View 3	 A photograph showing the internal circuit board of a circular electronic unit (EUT) next to its metal housing. The circuit board is populated with various electronic components, including a microcontroller, capacitors, and resistors. The metal housing is a simple ring with a central opening. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters.
EUT Housing and Board View 4	 A photograph showing the internal circuit board of a circular electronic unit (EUT) next to its metal housing. The circuit board is populated with various electronic components, including a microcontroller, capacitors, and resistors. The metal housing is a simple ring with a central opening. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters.

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'View 1', placed on a blue textured surface. The component is irregularly shaped with a central circular cutout and several mounting points. It is populated with various electronic components, including a large black integrated circuit (IC) in the center, a red electrolytic capacitor on the right, and several smaller surface-mount components. A black L-shaped ruler with white millimeter markings is positioned around the component for scale. The ruler shows the component is approximately 40mm wide and 30mm high.
Solder Board-Component View 2	 A photograph of the same green PCB component, labeled 'View 2', showing the reverse side. This view reveals the solder pads and the underside of the components mounted on the top side. A large, rectangular silver-colored pad is visible near the top center. The central circular cutout and mounting holes are also visible. The same black L-shaped ruler is used for scale, showing the component's dimensions are consistent with View 1.

Solder Board-Component View 3	 A circular electronic component, likely a microcontroller or sensor module, is shown against a blue background. The component is dark with various surface components, including a large square chip, several smaller chips, and numerous solder pads. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The component's diameter is approximately 20 mm.
Solder Board-Component View 4	 The same circular electronic component is shown from a different perspective, highlighting the underside or a different side. It features a large circular area, possibly a heat spreader or a mounting pad, and several small solder points. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The component's diameter is approximately 20 mm.
