# Important Charging Notes

- 1. Longest life and best performance can be obtained if a device is charged when the air temperature is between 65°F and 75°F (18° – 24°C). DO NOT charge a device in an air temperature below +40°F (+4.5°C), or above +105°F (+40.5°C). This is important and will prevent serious damage to the device.
- The earphones may become warm to the touch while charging. This is a normal condition, and does not indicate a problem. To facilitate the cooling of the earphones after use, avoid placing the earphones in a warm environment such as in a metal shed or an uninsulated trailer.
- 3. If the earphones do not charge properly:
- a. Check operation of the receptacle by plugging in a lamp or other appliance.
- b. Check to see if the receptacle is connected to a light switch which turns the power off when you turn out the lights.
- c. Move the earphones to a location where the surrounding air temperature is approximately 65°F 75°F (18° 24°C)
- 4. Do not freeze or immerse the earphones in water or any other liquid.

**AWARNING:** Shock hazard. Don't allow any liquid to get inside the earphones. Electric shock may result.

**AWARNING**: Burn hazard. Do not submerge the earphones in any liquid or allow any liquid to enter the earphones. Never attempt to open the earphones for any reason. If the plastic housing of the earphones breaks or cracks, return it to a service center for recycling.
