

Date: October 14, 2022

Description of Permissive Change

The application is prepared for FCC class II permissive change by adding GFSK channels through software enabling to its original parent application. The adding channels are from 12 channels to 79 channels in 2403 ~ 2481 MHz.

There is no FCC class II hardware change done to the device and no change to Distribution and Security procedure.

Both devices, original and updated versions, are electrically identical in all aspects except adding GFSK channels.
