

User Manual

R5

Please read the instructions carefully before using it.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

1.How to connect watch with mobile phone?

1.1 Download GloryFit APP on your smartphone

Using mobile phone browser program to scan the QR code below or the built-in QR code on the watch menu to download GloryFit app. And then install it. Please allow the corresponding permission for this software. (Note: GloryFit is compatible with iOS 9.0, and

Android 6.0 above system.)

1.2 Connect smartwatch with smartphone on GloryFit

Open the GloryFit application, you can choose to skip the login or use the email and other third-party login to log in. Before logging in, you need to agree to the "User Agreement" and "Privacy Policy". After the login is successful, set the background operation permissions and personal information settings.

iOS

Open GloryFit--Device--Add a new device--Select device—Connecting-- Allow Bluetooth pairing--connected successfully.

Andriod

Open GloryFit—Open Bluetooth function of smartphone--Device--Add a new device--Select device—Connecting--connected successfully.

Agreement of "User Agreement" and "Privacy Policy" is required. Please allow the background run permissions. Please allow the background run permissions.

1.3 If you cannot find the device name on app?

Because smartwatch was connected with the smartwatch via Bluetooth, so the APP cannot find the smartwatch.

Solutions:

Please clear all your Bluetooth Devices on your smartphone.

1.4 Tips

iOS

If the Apple mobile phone is not used for a long time (more than 2 hours), it is in standby or sleep mode, GloryFit may be cleaned up by the Apple IOS system, so watch will disconnected with iPhone. The GloryFit application function will not be available. Please open the GloryFit application again, and the watch will automatically reconnect.

Android

Please open the background application startup permission in the phone's settings.

Take Huawei mobile phone as an example, the steps are as follows:

Settings-Application-Application startup management-GloryFit, find the APP application, change the automatic management to manual management, and open all permissions

(Allowing self-starting, allowing associated startups, allowing background activities). This work can make sure the GloryFit will not be cleaned up by the Android system.
