RE: Hetronic International

FCC ID: LW9-MFSHL915

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Have different button configurations been evaluated to ensure worse case duty factor has been shown? If multiple buttons are pressed at the same time, how does this affect the duty cycle?
- 2) Please confirm RBW and VBW settings for Peak readings > 1 GHz and also for the Fundamental at 915 MHz.
- 3) IC Listing Letter in the IC form does not appear to have been filled out. Please provide.
- 4) Please confirm if this device is a TX or Transceiver. For IC, when the device incorporates a RX, RX emissions must also be provide. Please review, correct, and/or explain as necessary.

Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
