

Applicant: High Tech Computer Corp
FCC ID: NM8HERM200
Correspondence Reference Number: 31796
731 Confirmation Number: EA768603
Date of Original E-Mail: 10/12/2006

Subject: FCC Equipment Authorization System

1) Related to end-use compliance with RF exposure requirements, user manual has: "This product should be operated in the suggested normal condition only to ensure the radiative performance and safety of the interference," however "suggested normal condition" does not appear to be described - please explain how this instruction applies, or revise if appropriate.

<Response> The "suggested normal condition" refers to all the functional descriptions of the device in the user's manual. I have also added "described throughout this manual" to the sentence in page 5 of the attached manual. Please kindly advice if this is acceptable to the commission. Thanks.

Best regards,
