

CEILING FAN VOICE CONTROL MANUAL

Model # MS380A

APPEARANCE:

PAIRING PROCESS

- Step: 1.** Install the voice control to the power adapter with plug-in USB or computer USB. The voice control would be make a beep sound for indicating power on. Within 10 seconds of turning the receivers AC power ON, speak the pairing password to the voice control. The voice control would send frequency to the ceiling fan.
- Step: 2.** The receiver of ceiling fan has detected the frequency, the fan light will flash two times and turn off. It is pairing ok and ready to control.

NOTE: The remote distance from the voice control to the ceiling fan is about 10-12m. Microphone effective distance is about 3-5m.

After completing the steps above, you should be able to operate the ceiling fan and light. If the fan is not responding to the voice control, please turn the power off to the receiver and repeat step 1 and 2.

OPERATIONS

Every time please speak awakening password at first. Then speak control command words.

Function	Voice control command words
Pairing setting	Pairing setting
Turn fan off	Turn fan off
Turn light on	Turn light on
Turn light off	Turn light off
Turn fan at lower speed	Fan lower speed
Turn fan at low speed	Fan low speed
Turn fan at Med. speed	Fan Med. speed
Turn fan at high speed	Fan high speed

Note:

After speaking awakening password, please speak the control command words within 10 seconds. If the voice control makes beep sound twice, it is mean timeout. Please repeat speaking awakening password and control command words.

Please note the improper volume and speed of speaking cause control failure.

Specifications

Power supply: 5VDC, USB jack

315M remote control distance: 10-12M

Microphone effective distance: 3-5M

Working environment noise: $\leq 50\text{dB}$

Working environment temperature: $-10^{\circ}\text{C}\sim 50^{\circ}\text{C}$

Working environment humidity: 0~90%RH, non-condensing

To assure continued FCC compliance:

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna. --Increase the separation between the equipment and receiver. --Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. --Consult the dealer or an experienced radio/TV technician for help.

CAUTION:

To assure continued FCC compliance:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

FCC ID : 2AQZU-18031

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
