FCC Disclaimers

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Notes: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If interference is caused by this equipment, you may be required to correct the interference at your own expense.

- 1. Do not use this device near moving vehicles.
- 2. Do not use the equipment near water or any equipment with water.
- 3. Do not use the equipment in a location where it may be exposed to water or other liquids.
- 4. Do not use the equipment in a location where it may be exposed to fire or other hazards.

The equipment complies with FCC radiation exposure limits set forth by an authorized government agency. During the operation of this unit a maximum of 1.6 W is absorbed by the body and 1.6 W is absorbed by the body of the device must be expected.

Features:
10 watt wireless charging
ambient lighting
3 light intensity settings

Powering PowerStation

Plug the USB-C end of the included power cable into PowerStation.

Plug the USB-A end into a power source with an output of at least 5 volts in order to achieve 10 watts of wireless charging.

Wireless Charging Status Light

If there is an error with wireless charging, the light will flash. This is typically when there is misalignment with the charging coils or if there is something between the device and PowerStation preventing it from charging.

Wireless Charging
Place your wireless charging compatible device in the middle of the circle of PowerStation.

Align the center of your device with the center of the circle to ensure correct positioning.

You can charge devices such as tablets, or even a key, etc. as long as they are compatible with standard wireless chargers.

The lighting will turn on when charging begins. You can now adjust the lighting using the button found next to the power cable.

When you remove your device off PowerStation the lights will turn off automatically.
