## Data Reuse Summary PY7-63649Q

We are applying data reuse for FCC ID PY7-63649Q (variant) of the unlicensed band based on parent model FCC ID PY7-54955X (except for PCE and DXX) and PY7-76625R (PCE and DXX). Those three devices share the same PCB layout, antennas and components except as the PCB parts described in theory of operation appendix B.

The unlicensed band data for the parent model remains representative for the variant model (equipment classes DXX, DSS, DTS and NII) and test reports for the parent model plus test report(s) with the spot check data for the variant model have been submitted. The power to be listed on the F-731 and FCC grants for these bands are the values detailed in the parent report as the spot check data shows all values within expected tolerances of the parent model.

FCC ID	802.11 DTS	Bluetooth DTS	Bluetooth DSS	802.11 NII	FCC ID	NFC DXX
PY7-					PY7-	
54955X	ZR/2020/C003404	ZR/2020/C003403	ZR/2020/C003402	ZR/2020/C003405	76625R	SZEM201201323901
Parent					Parent	
PY7-					PY7-	
63649Q	ZR/2020/C004705	ZR/2020/C004704	ZR/2020/C004703	ZR/2020/C004706	63649Q	SZCR201300006501
Variant					Variant	
	Indicates full set of test data. Values in this report to be listed on the grant for these bands.					
	Partial test data used to confirm that parent model data is representative for the variant model. Data for these bands					
	is for reference only					

For the licensed bands (equipment code PCE) we have submitted test reports for the parent model and variant model. The major change between the parent model and variant model is band configuration by SW. The detail is described in the appendix B of the technical description.

SAR have been fully tested on the variant model.

We confirm that the test data reuse policy of FCC KDB 484596 D01 Referencing Test Data v01 has been followed and take full responsibility that the test data as referenced rom the parent model report represents compliance for the new FCC ID.
