Subject: APPLICATION FOR CLASS 2 PERMISSIVE CHANGE TO FCC AUTHORIZED Transceiver

with FCC ID: AZ489FT7097

Dear Sir/Madam,

A Class 2 permissive change is requested for the subject transceiver which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

One (1) New Battery revision was added into the radio family due to End of Life (EOL) of parts and design optimization purposes.

Battery Kit No	Descriptions
PMNN4491C	BATT IMPRES LIION IP68 2100T

B. PERFORMANCE DIFFERENCES:

SAR degradation is observed in EME compared to the original filing but still within the FCC limits. No EMC Testing is required

C. CONCLUSION:

This radio continues to meet all FCC emissions requirements for which authorization was granted. However, SAR degradation is observed in EME compared to the original filing but still meet requirements of a Class-2 Permissive Change.

Sincerely,

Deanna Zakharia
