Getting Started

Unboxing the Watch

When you receive your E18 Smart Watch, it will be packaged in a box. Inside the box, you will find the watch, a charging cable, a user manual, and a warranty card. Please check the contents carefully to ensure that everything is in good condition.

Charging the Watch

The watch is powered by a rechargeable battery. To charge the watch, connect the charging cable to the back of the watch and plug the other end into a USB port. The watch will be charged automatically when it is connected to the cable.

Setting up the Watch

Initial Setup

When you turn on the watch for the first time, it will enter the initial setup mode. You will need to follow the on-screen instructions to complete the setup process. This includes selecting your language, setting your time zone, and connecting the watch to your smartphone.

Connecting to a Smartphone

The watch must be connected to a smartphone to use its full features. To connect the watch to your smartphone, download the E18 Smart Watch app from the Google Play Store or the Apple App Store. Open the app and follow the instructions to pair the watch with your phone.

Using the Watch

Basic Functions

- Touchscreen:** The watch has a large touchscreen that can be used to navigate through the interface. Tap the screen to select options and swipe to scroll through lists.
- Buttons:** There are two physical buttons on the watch. The top button is used to go back to the previous screen, and the bottom button is used to go to the home screen.
- Notifications:** The watch can display notifications from your smartphone. You can view messages, emails, and app notifications directly on the watch face.

Health and Fitness

Heart Rate Monitor

The watch features a heart rate monitor that can track your heart rate in real-time. To use the heart rate monitor, place your index and middle fingers on the sensor on the back of the watch. The watch will display your heart rate on the screen.

Pedometer

The watch has a built-in pedometer that can track the number of steps you take. You can view your step count on the watch face or in the E18 Smart Watch app.

Sleep Tracker

The watch can track your sleep patterns and provide you with a sleep score. To use the sleep tracker, wear the watch at night and make sure it is snug on your wrist. The watch will record your sleep duration and quality.

Smartwatch Features

Call and Message Notifications

The watch can receive call and message notifications from your smartphone. When you receive a call or a message, the watch will vibrate and display the notification on the screen. You can answer calls and reply to messages directly from the watch.

Music Control

The watch can control the music playback on your smartphone. You can play, pause, skip, and shuffle music from the watch face. The watch also has a built-in music player that can store and play music files.

Smartwatch Features (Continued)

Weather Forecast

The watch can display the weather forecast for your current location. You can view the temperature, humidity, and wind speed on the watch face. The watch also has a built-in weather app that provides more detailed weather information.

Find My Phone

The watch can help you find your lost smartphone. When you tap the "Find My Phone" button on the watch face, the watch will send a signal to your phone to ring it. This feature is useful for finding your phone if you have lost it.

Smartwatch Features (Continued)

Remote Camera Control

The watch can be used to control your smartphone camera remotely. You can take photos and videos from the watch face. This feature is useful for taking photos of yourself or for capturing moments that you cannot reach with your phone.

Find My Watch

The watch has a built-in "Find My Watch" feature that can help you locate your lost watch. When you tap the "Find My Watch" button on the watch face, the watch will emit a loud beep to help you find it.

Smartwatch Features (Continued)

Custom Watch Faces

The watch has a variety of custom watch faces that you can choose from. You can select a watch face that matches your personality or your current mood. You can also create your own custom watch face using the E18 Smart Watch app.

App Store

The watch has access to a variety of apps that you can download. You can find apps for fitness, productivity, and entertainment. You can download apps directly from the watch or from the E18 Smart Watch app.

Smartwatch Features (Continued)

Waterproof

The watch is waterproof and can be used while swimming. It has a water resistance rating of 50 meters, which means it can withstand water pressure up to 50 meters deep. You can use the watch for swimming, surfing, and other water sports.

Long Battery Life

The watch has a long battery life that can last for up to 7 days on a single charge. You can extend the battery life by turning off some of the features that consume more power, such as the heart rate monitor and the sleep tracker.

Smartwatch Features (Continued)

Health Monitoring

The watch can monitor your health in a variety of ways. It can track your heart rate, blood pressure, and oxygen saturation. It can also monitor your stress levels and provide you with tips to reduce stress. The watch has a variety of health-related features that can help you stay healthy and active.

Security

The watch has a variety of security features that can help protect your personal information. It has a built-in lock that can be activated when you are not wearing the watch. It also has a "Find My Watch" feature that can help you locate your lost watch.
