Hi Michael,
this seems to be sound like good news to me.

Hi Kevin,

We spoke with OET, and please make upload the email string (including the additional email sent 12/14/2023) as a separate attachment to your submission.

As noted, their usual process requires a DA or FCC reference number, but in your case, the email string provides documentation of the FCC's waiver approval.

Please let us know if you have any other questions.

Thanks,
Alice

Thanks, Kevin. We will reach out to our colleagues in OET and look into the situation.
Alice

CAUTION: This email originated from outside of the Federal Communications Commission. Do not click on links or open attachments unless you recognize the sender and trust the content to be safe. If you suspect this is a phishing attempt, please use the 'Report Message' feature in Microsoft Outlook or forward the email to the NSOC.

Dear Alice,

On submitting our Test Reports to the FCC, along with the waiver grant that you provided us via email, we got the following response from the FCC:

1. Follow KDB Publication 502150 D01, most importantly, clause 6 and 7.

1.1 As such, provide a copy of the waiver as a supporting attachment, comply with clause 6. d)

1.2 The Grantee name must comply with the KDB Publication 502150D01, clause 7.

2. What is the Waiver number? Email correspondence is not considered as proof of Waiver. A waiver must be granted by FCC, and it must have assigned specific waiver number by FCC. If they follow KDB Publication 502150 D01, clause 5, they must have the proper Waiver with subsequent Waiver number. Example of Waiver is Waiver DA 23-343. If you google, "Waiver DA 23-343" or just "DA 23-343", you can see it. "DA 23-343" is the specific number we referred to in this response. Your waiver should look like this.

3. Your application indicates that Waiver was granted on 6th December 2023. Please provide copy of that grant. As indicated in #2 above, it must be from FCC with specific waiver number. Example of Waiver is Waiver DA23-343. If you google, "Waiver DA 23-343" or just "DA 23-343", you can see it.

4. It appears that even the FCC ID: K6KSMALLSATCOM was granted incorrectly. We will take corrective actions. If you have a Waiver letter from FCC with specific waiver number, we will audit the application and allow you to upload it. Otherwise, we will be forced to take appropriate action. Example of Waiver is Waiver DA 23-343. If you google, "Waiver DA 23-343" or just "DA 23-343", you can see it.

It seems that the email response indicating that the waiver has been granted is insufficient, and the waiver needs to be published, and given a "DA XX-XXX" number.

As you can also see from their response, they are retrospectively looking at our previous submission and indicating that it had been done incorrectly. Please would it be possible to publish the waiver for K6KSMALLSATCOM too, otherwise, from what I understand from their correspondence, they are potentially looking like they could revoke our FCC approval for this device.

Please let me know if you can support me with this.

Best regards,

Kevin.

Hi Mr. Watson,

The Federal Aviation Administration requested that we send you the following information pertaining to this waiver:

- Please be aware that the FAA approval is also required when using this equipment for aviation safety functions such as to provide separation from other aircraft or obstacles, or for UAS control links.

Let us know if you have any questions.

Regards,
Alice Koethe

Mr. Watson:

With this email, the attached waiver request (Aeronautical-Mobile Satellite Service FCC ID K6KSATCOM5G, dated May 24, 2023), is granted, subject to the following condition:

- Transmittals in the 1668-1675 MHz band are not authorized.

Your equipment authorization submittal to the Office of Engineering and Technology must include a copy of this email.
